New COVID-19 Vaccination History Feature Added to With Wellness™, the PHR App

Tokyo, Japan, July 1, 2021 --- H.U. Group Holdings, Inc. (President and Group CEO: Shigekazu Takeuchi) today announced Ishinban, Inc. (President & CEO: Masaaki Takeyasu; Head Office: Shinjuku-ku, Tokyo), its wholly-owned subsidiary, added a COVID-19 Vaccination History feature to With Wellness™, the Personal Health Record (PHR) app for health management. The new feature enables users to record their COVID-19 vaccination history and physical condition after vaccination. The service commenced today.

Ishinban provides the With Wellness app that enables users to record and understand data about health and test results such as blood and urine tests and COVID-19 PCR tests.* The newly added COVID-19 Vaccination History feature enables users to record their vaccination dates, vaccine manufacturer name, vaccine lot number, and place of vaccination. The feature also enables users to save images of important records including the vaccination vouchers provided by local governments and the vaccination certificates distributed following vaccination. Users are able to record any adverse reactions or changes in their physical condition after vaccination. This prevents the loss of vaccination records and helps increase the accuracy of communications when users visit medical institutions after they are vaccinated.

Currently, local governments and workplaces are working to vaccinate more people beyond elderly people and medical professionals. There are several kinds of COVID-19 vaccines, and the schedule for immunization varies for each vaccine. Therefore, it is important to know the manufacturer of vaccine and the number of times people have received the vaccine when they are vaccinated. With Wellness will enable users to manage their health information, including their COVID-19 vaccination history and help keep them healthy.

By addressing social issues in the medical field and promoting the development of new business, H.U. Group will create new value in healthcare and thereby contribute to human health and the future of medical care.

*Only for medical services provided by clinics that have introduced E's Assist, the medical practice support service provided by Ishinban.
